

CLINICAL&RESEARCH NETWORK DEVELOPMENT MANAGER POSITION DESCRIPTION

LOCATION - This post can be based everywhere in Europe and travel within Europe is expected.

STATUS - Contract for one (1) year. Role is renewable based on performance.

Hours - Full time position.

SALARY - Commensurate with experience.

WORKING with - The INNODIA Managing Team and the Clinical Trial Site Accreditation Team

REPORT to - The INNODIA Managing Director

BACKGROUND

INNODIA is an **international non-profit organization** (IVZW in Belgian) - established in Belgium in July 2022 – stemming from an European-based public private partnership receiving funding from the Innovative Medicines Initiative 2 Joint Undertaking (IMI-JU) and supported by the European Union’s Horizon 2020 Research and Innovation program, the European Federation of Pharmaceutical Industries and Associations, The Helmsley Charitable Trust, and JDRF. Thanks to this unique private-public interaction, INNODIA **has become the largest European research and clinical project ever started dedicated to helping people living with type 1 diabetes**. The INNODIA project has shown how academic researchers and clinicians, industry and patients can effectively collaborate to defeat type 1 diabetes. To guarantee continuity and expansion of this successful research and clinical network, INNODIA has been transformed into a legal entity with the **MISSION to facilitate the development of new cures and promote disease modifying therapies for people living with type 1 diabetes, everywhere**.

Our concept is to **create a network of expert sites accredited by INNODIA** that are listed, verified, inspected, and that will be **advertised to drug developers** wanting to perform fast and efficient clinical intervention trials in type 1 diabetes (all stages) with new or already approved disease modifying therapies. In addition to this core activity, thanks to the inclusion of world-renowned scientists and physicians, and expert people living with type 1 diabetes, INNODIA offers corollary services (e.g expert advices, access to academic top-level labs, clinical grade labs, and patients’ perspective) to run innovative and “*all included*” clinical studies.

INNODIA’s strategy is to muster, develop and engage a network of accredited clinical trial sites and top-level research centers to become the landmark for drug developers in the field of type 1 diabetes and a reference point for the whole scientific community.

A Clinical and Research network development manager is sought to lead the organization in building, monitoring, value, and supporting the whole INNODIA network.

PURPOSE OF THE POSITION

The Clinical & Research Network Development Manager will work in strict collaboration with the Managing Director to:

- perform the recruitment of new members within Europe and guarantee their inclusion into the **INNODIA** Network
- develop and implement a deep profiling activity of each member
- ensure a timely and appropriate accreditation process of the **INNODIA** Clinical Trial Sites
- oversee and ensure Clinical Trial Sites performance
- develop, implement, and sustain the **INNODIA** *Clinical Trial Site Support and Engagement Program*
- develop, implement, and sustain the **INNODIA** *Research Support and Engagement Program* and the **INNODIA** *Peer Learning Program*

REQUIREMENTS

- At least a Master degree in biomedical/scientific fields or related fields
- Proven project management experience gained in multi-partner projects
- Basic Knowledge of clinical research practices, research and development activities, and drug development processes
- Knowledge of research and medical terminology, experience working in a clinical and/or research environment
- Demonstrated ability to maintain high work standards with limited supervision and an ability to ensure other team members work efficiently
- Ability to interact professionally with a variety of stakeholders
- Ability to work independently as well as part of a team
- Strong leadership and motivational skills as well as effective communication, organisational and time management skills
- Pro-active and creative attitude
- Fluent in English both written and oral (knowledge of multiple languages will be highly regarded)
- Well-developed computer skills in database management, MS Word, Excel and web based research
