4.00 pm

2h

SPEAKERS

Sanjoy Dutta, PhD.

Vice President, Research, JDRF International

Prof. Peter Achenbach

Deputy Director, Group Leader Immune Phenotyping

Helmholtz Zentrum München

German Research Center for Environmental Health

Prof. Chantal Mathieu

Professor of Medicine, Katholieke Universiteit; Chair of Endocrinology, University Hospital Gasthuisberg; Vice President of EASD, Leuven, Belgium. Chair EUDF

Prof. Marian Rewers

Professor of Medicine, University of Colorado Denver - Anschutz Medical Campus

Screening of type 1 diabetes in prone families in relation to autoantibodies can provide an opportunity to educate and prepare families for disease symptoms and prevent Diabetic ketoacidosis (DKA) a dangerous and even death condition. Furthermore, therapeutic interventions under clinical development could significantly delay the onset of T1D and potentially stop the disease from developing at all.

At this webinar, we are looking at engaging world leading experts of T1D screening, as well as patients, policy makers and other stakeholders to help us to discuss the inclusion of screenings for pre-symptomatic type 1 diabetes into the standard care service catalogue.
